

## 2 on 2 on 2

This is a fun game! It is best if you have access to three nets. Three teams of two play each other with one puck. Each team has a net that they are defending, which means they can score on either of the other two nets. If you have more than six players, then you can make it so that the team that gets scored on has to sit out until it is their turn again. The goals of this drill are primarily creativity and awareness.
